

MARKETING PERFORMANCE ANALYSIS

PROJECT SUMMARY

1. PROJECT OVERVIEW

This project involved analysing marketing performance data using Microsoft Power BI. The project focused on understanding campaign performance, customer engagement, marketing channels, and key performance indicators through interactive dashboard development.

2. PROJECT OBJECTIVE

The primary objective was to transform structured marketing data into meaningful visual analysis that could support the evaluation of marketing performance and business decision-making.

3. PROJECT PROCESS

The project followed the following analytical workflow:

- Reviewed the raw marketing dataset.
- Studied the data dictionary to understand the available fields.
- Prepared and structured the data for analysis.
- Organised relevant data fields and analytical dimensions.
- Analysed marketing performance indicators.
- Developed a three-page Power BI dashboard.
- Created visualisations to evaluate campaign, channel, and customer-related performance.
- Interpreted the dashboard to identify meaningful marketing patterns.

4. DASHBOARD STRUCTURE

The Power BI dashboard consists of three analytical pages designed to provide different perspectives on marketing performance.

Page 1: Executive Overview

Page 2: Customer Profile

Page 3: Product Insights

5. KEY ANALYTICAL AREAS

- Campaign Performance
- Marketing Channel Analysis
- Customer Engagement
- Conversion and Response Metrics
- KPI Monitoring
- Performance Comparison

6. TOOL USED

Microsoft Power BI

7. SKILLS DEMONSTRATED

Data Understanding | Data Preparation | Data Modelling | DAX | KPI Analysis | Marketing Analytics | Data Visualization | Dashboard Development | Business Insight Generation

8. PROJECT OUTCOME

The project resulted in a three-page Power BI dashboard that presents marketing performance data through interactive visualisations.

The project demonstrates the ability to work with structured marketing data, understand data fields, develop analytical dashboards, and communicate business performance through visual reporting.

9. KEY LEARNING OUTCOMES

This project strengthened practical skills in:

- Understanding marketing datasets
- Preparing data for business analysis
- Developing Power BI dashboards
- Creating KPI-based visualisations
- Analysing campaign performance
- Comparing marketing channels
- Interpreting customer response patterns
- Presenting marketing insights visually
